

Grant Sackmann

grant.sackmann@icloud.com • 864-344-3776 • <https://www.github.com/5341kmann>

Education

Grinnell College | Grinnell, IA

Spring 2027

Computer Science

- **Relevant Coursework:** Econometrics, Data Structures & Algorithms, Data Science, Software Design, Discrete Math

Aquincum Institute of Technology (AIT) | Budapest, Hungary

Fall 2025

Study Abroad in Computer Science

- **Coursework:** Mobile Software Development, Algorithms, Graph Theory, and Hungarian Culture

Technical Skills

Languages: Java, Kotlin, Python (Pandas, NumPy), SQL, C, HTML/CSS.

Tools & Frameworks: Android Studio, Jetpack Compose, Firebase, Git/GitHub, AI-Assisted Development

Concepts: End-to-End Development, MVVM Architecture, Data Structures, Agile

Software Projects

UniCab (Campus Rideshare App) | Kotlin, Jetpack Compose, Firebase

Fall 2025

- **Owned end-to-end development of a full-stack Android app**, bridging student transportation gaps.
- **Architected a scalable MVVM codebase** using Hilt for dependency injection, ensuring long-term maintainability and testing efficiency.

Cryptographic Blockchain | Java, OOP, SHA-256

Spring 2024

- **Implemented core Computer Science fundamentals** by engineering a tamper-resistant blockchain with a custom object structure for transactions.
- **Developed a secure mining algorithm** using SHA-256 and nonce validation, managed via a command-line interface to demonstrate robust backend logic.

Experience

Grinnell College | Undergraduate Researcher (Astrophysics)

Summer 2025

- **Performed large-scale data analysis** on 40+ million galaxy simulation particles using Python (NumPy, Pandas)
- **Optimized data extraction pipelines** achieving a 100x processing speed-up, engineering robust concurrent processing solutions.

MIT Beaver Works | Quantum Engineer

Summer 2022

- **Engineered a Quantum Classifier** in Python and IBM Qiskit with 91% accuracy for heart failure prediction, demonstrating application of complex algorithmic concepts.
- **Collaborated remotely in an agile environment** using Git/GitHub, ensuring code quality and version control standards.

Community Leadership

Girls Who Code | Director & Board Member

Spring 2024–Present

- **Mentored 20+ middle school students**, fostering a sense of belonging in STEM through personalized instruction.
- **Developed custom CS lesson plans**, translating complex algorithms into accessible concepts to empower underrepresented groups in technology.

Habesha Student Organization | Treasurer

Spring 2024–Present

- **Facilitated community connection** by managing financial operations for cultural events, ensuring proper resource allocation for member engagement.
- **Generated financial reports and dashboards** to track a \$3,000 budget, interpreting data to support executive decision-making.
